

BK 800

More options for controlling more brush – basal bark, cut stump, dormant stem or foliar applications controls broadleaf weeds, too!

BK 800 Brush Killer is a low-volatile ester Trimec herbicide complex, a combination of active ingredients widely respected for effective control of hard-to-kill brush and broadleaf weeds. BK 800 is highly regarded not only for its effectiveness in controlling unwanted vegetation without risk to desirable cool season grasses when used as a foliar spray, but also for its cost-effectiveness. And because of the high degree of cool season turfgrass tolerance, treated areas need not be stripped of erosion protection.

BK 800 knock-out punch can be delivered via the method and timing that works best for you, including dormant season applications. It can be mixed with oil for making low profile applications using back pack

sprayers. Or you may use a spray gun and spray individual stems or stumps, or stubs that have been bush-hogged. Mixed with water it may be applied as a foliar spot treatment. Or you can apply as a broadcast spray, particularly where broadleaf weeds are your major target, or where maintaining turf grasses is a key objective.

BK 800 may be tank-mixed with other approved IVM products such as Embark® 2S IVM or Stronghold™ PGR. Tank-mixed with Garlon® 4 Herbicide and properly applied, near perfect control can be expected.

Embark is a registered trademark of PBI-GORDON CORPORATION.

Stronghold is a trademark of PBI-GORDON CORPORATION.

Garlon is a registered trademark of Dow Agro Sciences, LLC.

Most cool-season grasses are tolerant to BK 800 when mixed with water.

- ***Kills unwanted trees, including conifers, vines and broadleaf weeds***
- ***Tough on brush, but gentle on grasses, foliarly applied***
- ***Ideal in oil mixtures for backpack or spray gun applications***
- ***Basal applications may be made anytime including dormant season***

- ***Year round flexibility***
- ***May be mixed with oil for spraying stumps and freshly cut stems and stubs***
- ***Penetrates and translocates to kill roots***
- ***Tank mixed with Garlon® 4 Herbicide . . . for near perfect control***
- ***Cost effective, used alone or in tank mixtures***

RECOMMENDATIONS

For controlling brush and broadleaf weeds along roadsides, in fencerows, firebreaks, airports, military establishments, utility and railroad rights-of-way, industrial sites and other non-crop areas.

ACTIVE INGREDIENTS:

Isooctyl (2-ethylhexyl) ester of 2,4-dichlorophenoxyacetic acid	32.45%
2-ethylhexyl ester of (+)-R-2-(2,4-dichlorophenoxy) propionic acid	15.90%
Dicamba; 3,6-dichloro-o-anisic acid.	5.38%
Inert Ingredients.	46.27%

EPA Reg. No. 2217-758

PACKAGING:

Plastic U.S. 2.5 gallons: 2 X 2.5 per case: shipping weight. 52 lbs.
30-gallon drum: shipping weight . . . 298 lbs.
