

EMBARK® 2-S

PLANT GROWTH REGULATOR

The world's most versatile growth regulator for ornamentals, turfgrasses, seedhead suppression and fruit prevention.

Mefluidide, the active ingredient in Embark® 2-S Plant Growth Regulator, provides landscape managers and other turf professionals with a wide variety of benefits depending on the timing and rate of the application.

Elimination of the stems and seed-heads allows energy to be redirected to the development of roots, rhizomes, stolons and tillers. The treated turf will tend to stay greener and lusher for extra weeks after the growth hold effect wears off.

Embark 2-S saves time, labor and equipment. Labor intensive trimming and edging can also be held in place with an application of Embark 2-S.

Spraying low-maintenance turf with Embark 2-S lets you and your budget take up to an 8 week break from mowing! This can be even more attractive when the mowing you are

eliminating is on steep hillsides, around ponds and lakes, or in other potentially hazardous situations.

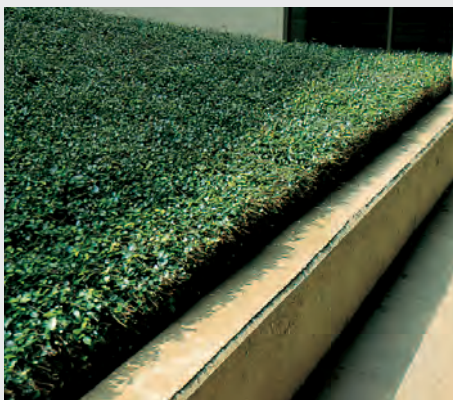

Embark 2-S can be tank-mixed with Trimec® or SpeedZone® broadleaf herbicides and fertilizers for turf applications.

Ornamental shrubs, hedges, trees and groundcovers treated with Embark 2-S 4 to 7 days after trimming or pruning stay within a few inches of their clipped height for up to 12 weeks!

Properly timed applications of Embark 2-S will also reduce or eliminate the nuisance fruit from ornamental olive trees.

Embark 2-S aids in spring transition of bermudagrass from overseeded ryegrass.

Embark, SpeedZone and Trimec are registered trademarks of PBI/GORDON CORPORATION.

- *Enhanced tillering and vibrant green appearance after growth regulation duration*
- *Suppresses growth of turfgrass for up to 8 weeks*
- *Best seedhead inhibitor available*
- *Can be tank-mixed and applied with many turf herbicides*

- *Low cost*
- *Reduced mowing, edging or trimming saves time, labor and equipment*
- *Reduces grass clippings and ornamental trimming refuse*
- *Suppress growth of ornamentals up to 12 weeks*

RECOMMENDATIONS

To eliminate seedheads and reduce mowing on golf courses, fairways, cemeteries and parks. Trimming applications around headstones, sign posts, fence lines, and trees. Reduce trimming of hedges and ornamental plantings. Suppress fruit production of ornamental olive trees.

ACTIVE INGREDIENT:

Diethanolamine salt of mefluidide
N [2,4-dimethyl-5-[[trifluoromethyl) sulfonyl]amino]phenyl]acetamide 28%
Inert Ingredients 72%

EPA Reg. No. 2217-759

PACKAGING:

Plastic U.S. gallons: 4 X 1 per case:
shipping weight 41 lbs.
Plastic U.S. 2.5 gallons: 2 X 2.5 per case:
shipping weight 54 lbs.
