Where to use:

Lawns and yards including these grasses may be treated with Gordon's® Grub-No-More™ Ready Spray.

Cool-Season or Northern lawns

Kentucky bluegrass,
perennial ryegrass,
tall fescue, fescues (red or fine leaf)

Warm-Season or Southern lawns

Bermudagrass, Common and hybrid
Centipedegrass
St. Augustinegrass
Zoysiagrass
Buffalograss
Bahigrass

Use Gordon's Grub-No-More Ready Spray to control larvae and nymphs of these insect pests: (Ranked in importance)

Soil insects:
White grub larvae including: <ul style="list-style-type: none"> • Chafers, European, Northern masked and Southern masked • Green June beetle • Japanese beetle • Oriental beetle • Asiatic garden beetle
Surface insects:
Sod webworm Chinch bug (suppression) Cutworms (suppression) Billbug

When to apply:

- For the white grub complex in Northern lawns, May is best time to apply this product.
- For the white grub complex in Southern lawns, May and early June is the best period to apply this product.
- Contact your State Agricultural Extension Service agents for additional and localized recommendations.
- Do not exceed one application of this product per season for lawns.

PEST OCCURRENCE AND TREATMENT TIMING CHART

The timing of the application for the product should match the vulnerable stages of the pests. These calendar schedules will vary between years and regions and provide an overview to guide your decision-making. These calendar schedules should not be considered as a forecast or localized predictor for managing insect pests. Consult (Contact) your State Agricultural Extension Service agent, follow their specific spray schedules and recommendations.

Irrigation:

- For grub (larvae) control: Rainfall or irrigation (0.50 inch) should occur within 24 hours after application. Thoroughly wet the lawn a few hours after applying.
- For armyworm and cutworms: Do not irrigate treated areas within 24 hours after application of this product.

Mowing:

Avoid mowing treated lawn until after adequate rainfall or irrigation has occurred.

Three Steps to Apply:

1. Measure the *total* (entire) lawn area to be sprayed. For rectangular areas, multiply the length by the width to obtain total square feet.
2. Connect a garden hose to the hose-end sprayer. Make sure the control valve on the nozzle is in the OFF position.
 - To BEGIN spraying: Turn on water at faucet. Point nozzle toward lawn to be treated and turn the control valve to the ON position. Water will automatically mix with the product. Spray evenly over the measured area.
 - To STOP spraying: Turn control valve to the OFF position. Turn off water at faucet. To relieve pressure, turn control valve to ON position and wait until water stops spraying before removing sprayer from hose.
3. SPRAY: Spray evenly over the measured area. Use the amount indicated for the size of retail container: This container covers approximately 5,000 square feet.

STORAGE AND DISPOSAL

Pesticide Storage: Store in original container in a cool, dry place, out of the reach of children, preferably a locked storage cabinet.
Combustible: Do not use or store near heat or open flame.

Disposal:

- **If Empty:** Do not reuse container. Place empty container in trash or offer for recycling if available.
- **If Partly Filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

LIMITED WARRANTY AND DISCLAIMER
