

MECOMEC® 4 & MECOMEC® 2.5

TURF HERBICIDE

Premium MCPP formulations for enhanced broadleaf control in turfgrasses including bentgrass.

Mecomec® Turf Herbicide is offered in two formulations — 2.5 pounds and 4 pounds — for those who prefer MCPP as a bentgrass herbicide. Mecomec provides an effective control for weeds such as clover and chickweed that develop in closely mowed turf such as golf greens and fairways. Mecomec

can be tank-mixed with other broadleaf herbicides to enhance clover control.

Mecomec is a cost-effective means of enhancing or “spiking” other herbicides.

Mecomec is a registered trademark of PBI/GORDON CORPORATION.
