TEREMEC® SP & TEREMEC® SP 2.9F

TURF FUNGICIDES

Fast Activity – Plus Prevention!

Teremec® SP is a contact turf fungicide containing chloroneb for the control of pythium blight, snow mold, brown patch and southern blight. One of the most cost effective products for controlling these turf-destroying disease organisms, Teremec SP has been a standard in golf course and other turf management programs.

For extended control of snow mold, mix with TransFilm® Anti-transpirant. Pythium blight control is optimized by including

Teremec SP in rotation with other fungicides. To date, pythium has shown no resistance to Teremec SP.

Teremec SP is labeled for use on established cool- and warm-season turfgrasses such as creeping bentgrass, annual bluegrass, fescue, zoysia, St. Augustinegrass and bermudagrass. Teremec SP is also labeled for the control of southern blight in new seedling grass areas.

Teremec and TransFilm are registered trademarks of PBI/GORDON CORPORATION.

PYTHIUM BLIGHT

GRAY SNOW MOLD

- A favorite for bentgrass greens, tees and fairways
- Contact control of pythium blight and brown patch
- Control of gray snow mold
- PCNB alternative for snow mold control
- Fast-acting plus prevention
- Labeled for use in cool- and warm-season grasses
- Tank-mix with TransFilm® for extended control
- Available in wettable powder and flowable formulations

RECOMMENDATIONS

For control of snow mold, pythium blight, brown patch and southern blight in turf-grasses.

FLOWABLE FORMULATION

ACTIVE INGREDIENT:

Chloroneb: 1,4-dichloro-2,5-dimethoxybenzene	30%
Inert Ingredients	70%

EPA Reg. No. 73782-4-2217

PACKAGING:

2 X 2.5 gallons per case:	
shipping weight	55 lbs.

WETTABLE POWDER FORMULATION

ACTIVE INGREDIENT:

Chloroneb: 1,4-dichloro-2,5-dimethoxybenzene	65%
Inert Ingredients	35%

EPA Reg. No. 2217-692

PACKAGING:

Three-pound paper bags:	
12 X 3 lb. per case:	
shipping weight	40 lbs.
