

TRIMEC[®] 1000

Low Odor
BROADLEAF HERBICIDE

Low Odor – Low Profile – Dead Weeds!

Trimec[®] 1000 Low Odor Broadleaf Herbicide is a proprietary mixed-amine formulation. Trimec 1000, contains MCPP and dicamba with two forms of 2,4-D – DEA (diethanolamine) and DMA (dimethylamine) for a total of four (4) ingredients. The combination of these two forms of 2,4-D is classified as a 'mixed-amine' with unique control activity that occurs when they are combined.

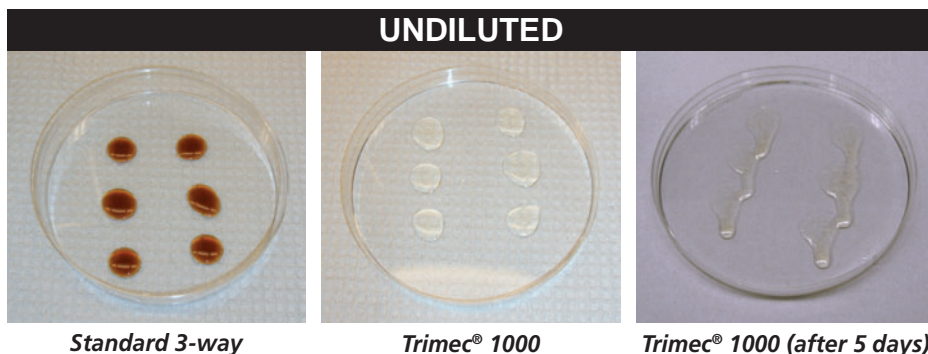

One unique aspect of the Trimec 1000 mixed-amine formulation is the way in which it translocates through the plant. The formulation resists crystallization (see 5-day photo below) allowing more thorough absorption into the plant, resulting in more active material translo-

cating down to the root of even the most deep-rooted perennials. This mixed-amine 2,4-D combined with MCPP and dicamba, provides an incredibly broad spectrum of weed control.

Another unique aspect of Trimec 1000 is its low odor, which means that weed-free turf can be accomplished without raising undue concerns from neighbors or others passing by treated areas. Trimec 1000 can be used in most cool-season and warm-season¹ turfgrass areas.

Trimec 1000 is the most recent addition to the trusted Gordon's Trimec family of reliable broadleaf weed control options.

¹Not labeled for use in St. Augustinegrass.
Trimec is a registered trademark of PBI-GORDON CORPORATION.

- Proven ingredients including the unique DEA 2,4-D
- Low odor
- Control of deep-rooted perennial weeds
- Economical formulation
- Visual activity includes stem curling and yellowing

- Premium inerts
- Can be applied in temperatures up to 90°F
- Controls most weeds in 14 to 21 days
- Rain-fast in 8 hours
- Reseed in 3 weeks
