

TRIMEC® SOUTHERN

BROADLEAF HERBICIDE FOR SENSITIVE SOUTHERN GRASSES

Designed specifically for sensitive southern grasses.

Trimec® Southern is designed to minimize risk to sensitive southern turfgrasses. But that doesn't mean it won't control tough weeds everywhere. In fact, recent research has shown that Trimec Southern is the most effective amine Trimec complex for clover control.

Trimec Southern is formulated with less 2,4-D to accommodate sensitive warm-season grasses, and higher in MCPP to maintain the quality performance you expect from a Trimec complex. This adjustment in formulation is the optimum

ratio for knocking out clover. So Trimec Southern isn't just for the south, it's for tough weed control anywhere, especially where clover or chickweed is the primary target.

Trimec Southern is intended for use on bermudagrass, zoysiagrass, centipedegrass and St. Augustinegrass¹ and can also be used on cool-season grasses such as bluegrass, fescues and ryegrass.

¹Do not apply this product to Floratam St. Augustinegrass.

Trimec is a registered trademark of PBI-GORDON CORPORATION.

RECOMMENDATIONS

For post-emergence clover, chickweed and other broadleaf weed control, especially in sensitive warm-season turfgrass areas on golf courses, residential and commercial lawns, sports turf and park and recreation areas.

ACTIVE INGREDIENTS:

Dimethylamine salt of (+)-(R)-2-(2-methyl-4-chlorophenoxy)propionic acid	17.37%
Dimethylamine salt of 2,4-dichlorophenoxyacetic acid	18.74%
Dimethylamine salt of dicamba (3,6-dichloro-o-anisic acid)	3.85%
Inert Ingredients	60.04%

EPA Reg. No. 2217-655

PACKAGING:

12 X 1 quart per case:	
shipping weight	33 lbs
4 X 1 gallon per case:	
shipping weight	42 lbs.
2 X 2.5 gallons per case:	
shipping weight	52 lbs.
