

ATRIMMEC®

PLANT GROWTH REGULATOR

Reduces trimming and pruning labor by 50% or more.

Atrimmec® is a systemic plant growth regulator which works by blocking the plant hormones that stimulate growth. Applied as a foliar spray, it is absorbed by the leaves and translocated to the shoot tips where it interrupts apical dominance and temporarily stops shoot elongation. One trimming and one Atrimmec application can last the entire season on many plants.

Spraying shrubs, hedges, trees and groundcovers not only reduces trimming and pruning labor by 50% or more, but Atrimmec also

improves the appearance of landscape ornamentals. It promotes lateral branching giving plants a more dense, fuller look. Hedges and shrubs that show irregular shapes including damage from pests and weather, can fill in lushly, even on the old wood, particularly if treated under optimum growing conditions.

Atrimmec is now labeled for reduction/elimination of nuisance fruit on landscape plants and trees including olives.

Atrimmec is a registered trademark of PBI/GORDON CORPORATION.

RECOMMENDATIONS

To reduce trimming and pruning of landscape ornamentals or trees; to replace hand pinching in nursery and greenhouse florist quality production and to control fruit set of ornamental olives.

ACTIVE INGREDIENT:

Dikegulac-sodium (Sodium salt of 2,3:4,6-bis-O-(1-methylethylidene)- α -L-xylo-2-hexulofuranosonic acid) . . . 18.5%
Inert Ingredients 81.5%

EPA Reg. No. 2217-776

PACKAGING:

Plastic U.S. quarts: 12 X 1 per case:
shipping weight 32 lbs.
Plastic U.S. gallons: 4 X 1 per case:
shipping weight 40 lbs.

- *A systemic plant growth regulator spray-applied to retard growth of hedges, shrubs, trees and groundcovers*
- *Reduces trimming, pruning and clean-up maintenance by 50% or more*
- *In many areas, one trimming and treatment controls growth all season long*
- *Keeps plants the way you trimmed them longer*

- *Enhances appearance of ornamentals by promoting branching; forms a fuller, more compact, uniform shape*
- *Groundcovers establish sooner, producing denser cover without encroaching on driveways, walks and walls*
- *Reduces nuisance fruits on landscape plants via bark banding and drench applications*
