

# BLADE™ MEASURING INSTRUCTION SHEET

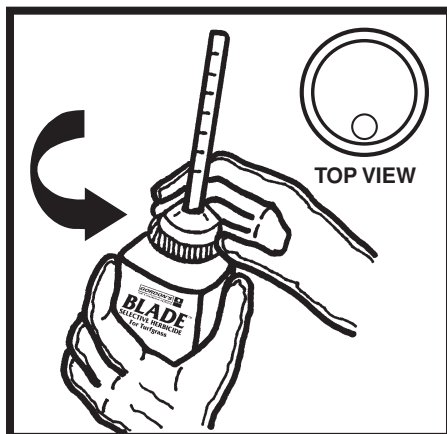

Dry Flowable Granule Product

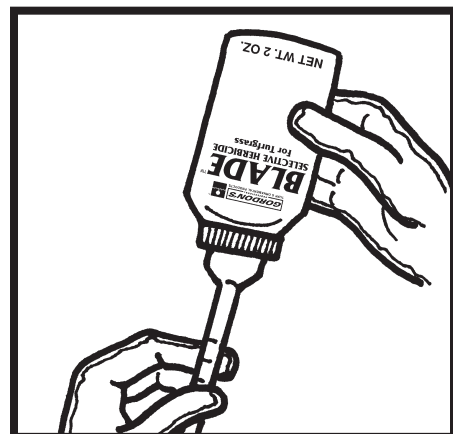

1. Remove cap from container.

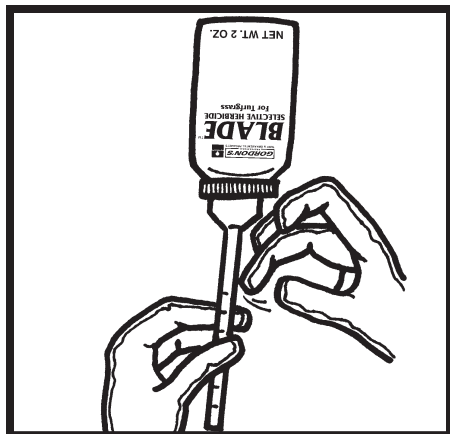

2. Tighten new cap and place plastic measuring cone on container.

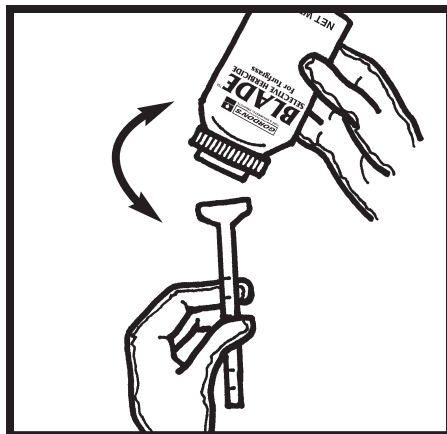

3. Twist cap a quarter turn counterclockwise to expose opening in lid.

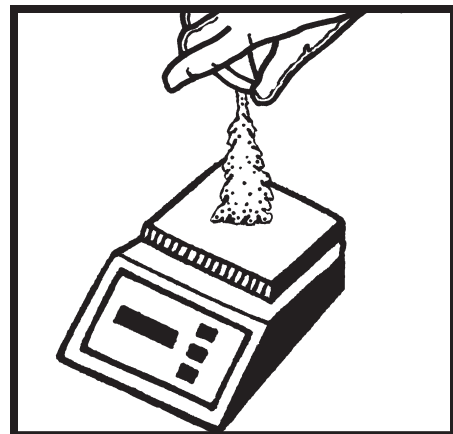

4. Invert container so product dispenses into measuring cone. Twist cap to control and stop flow.

5. Lightly tap measuring cone to level material. Check for correct number of ounces.

6. Carefully twist and separate measuring cone from cap. Pour product into spray tank.

7. Volumetric accuracy is  $\pm 7.5\%$ . Weighing is recommended for more precise measurement.
