

Fe⁺⁺RRROMECC[®]

LIQUID IRON PLUS MICROS

10-2-4

Nutrient and mineral supplement for maximum plant health.

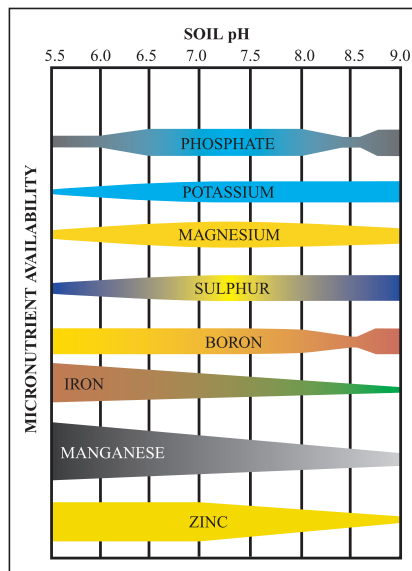

FERROMECC[®] Liquid Iron Plus Micros is a chelated iron formulation plus many important plant macro and micronutrients including potash, magnesium, manganese and zinc in a balanced form for immediate availability. FERROMECC Micros is designed to supplement all fertilization programs and works well in alkaline soils.

Soil pH has a direct impact on the availability of micronutrients for plant uptake. For instance, manganese may be readily available in soils with a low pH, but almost completely unavailable in soils with a pH greater than 5.5. Iron is also unavailable when the pH is greater than 6.5. Other nutrients are at optimum availability in higher pH soils or in a range from 5.0 to 6.0.

FERROMECC Micros is designed to provide these essential plant micronutrients in a balanced and

readily available form. FERROMECC Micros also maximizes plant health in sandy soils lacking organic matter or naturally low in micronutrients in the root uptake zone.

FeRRROMECC[®] is a registered trademark of PBI-GORDON CORPORATION.

RECOMMENDATIONS

For supplementation of all fertilizer programs to maximize vigor of turf and ornamental landscape plants and trees.

GUARANTEED ANALYSIS:

Total Nitrogen (N)	10.0%
10.0% Urea Nitrogen	
Available Phosphate (P ₂ O ₅)	2.0%
Soluble Potash (K ₂ O)	4.0%
Magnesium (Mg)	0.5%
0.5% Water Soluble Magnesium (Mg)	
Sulfur (S)	1.5%
1.5% Combined Sulfur (S)	
Boron (B)	0.02%
Iron (Fe)	4.0%
4.0% Chelated Iron (Fe)	
Manganese (Mn)	1.0%
1.0% Water Soluble Manganese (Mn)	
Zinc (Zn)	0.5%
0.5% Water Soluble Zinc (Zn)	

Derived from: Urea, Dipotassium Phosphate, Potassium Hydroxide, Magnesium Sulfate, Iron Citrate, Manganese Sulfate, Zinc Sulfate and Sodium Borate.

PACKAGING:

Plastic U.S. 2.5 gallons: 2 X 2.5 per case: shipping weight 63 lbs.
55-gallon drum: shipping weight 680 lbs.

- Chelated iron readily available
- Non-staining formula
- Tank-mix compatible with most turf care products
- Sprayable liquid form
- Foliar and root uptake

- Supplements fertilizer programs
- Corrects chlorosis due to unavailability of iron or other micronutrients
- Provides macro and micronutrients essential to plant health
