

Formec® 80

TURF & ORNAMENTAL FUNGICIDE

Controls fungal diseases in turf, ornamentals and flowers.

Formec® 80 Turf and Ornamental Fungicide is a broad-spectrum fungicide designed for preventive and curative disease control. The use of a regular protective spray program will minimize the risk of disease damage and can generally be accomplished with lower rates and less frequent fungicide application. If disease develops, higher rates and more frequent applications are required to bring the disease under control.

Formec 80 provides effective prevention and control of *Fusarium* blight, red thread, copper spot, slime molds, *Helminthosporium*

melting-out, *Rhizoctonia* brown patch, rust, *Pythium* blight, algae, dollar spot and *Fusarium* snow mold in turf.

Formec 80 also prevents certain diseases of carnations (leaf spot), dahlias (Botrytis blight), lilies (Botrytis blight), hollies (purple spot), irises (leaf spot), roses (black spot), chrysanthemums (Botrytis petal spot) and gladiolus (Curvularia and Botrytis blossom blight). To lengthen effectiveness, mix with TransFilm® Anti-transpirant.

Formec and TransFilm are registered trademarks of PBI-GORDON CORPORATION.

- Preventive and curative activity
- Broad-spectrum disease control
- For use on turf and certain ornamentals
- Include in fungicide rotation schedules

RECOMMENDATIONS

For prevention and treatment of turf and ornamental disease organisms.

ACTIVE INGREDIENTS:

Mancozeb: A coordination product of zinc ion and manganese ethylene bisdithiocarbamate 80%
 In which the ingredients are:
 Manganese⁺⁺ 16%
 Zinc⁺⁺ 2%
 Ethylene bisdithiocarbamate ion (C₄H₆N₂S₄) 62%
 Inert Ingredients 20%

EPA Reg. No. 2217-426

PACKAGING:

Four pound bags; 12 X 4 lb. per case; shipping weight. 55 lbs.
