

# KATANA™

## TURF HERBICIDE

### Outstanding transition-aid control of ryegrass. Postemergence control of grassy weeds, kyllingas, sedges and broadleaf weeds.

Katana™ Turf Herbicide controls annual and perennial grasses, sedges, kyllingas and broadleaf weeds with post-emergence and some pre-emergence activity. Highly selective in bermuda, zoysia and certain other warm-season turfgrasses, Katana is an excellent product for removal of overseeded cool-season grasses.

In university tests flazasulfuron, the active ingredient in Katana, has excelled in controlling ryegrass, clumpy ryegrass, *Poa annua*, *Poa trivialis*, tall fescue and annual ryegrass in warm-season turf. Katana is more active in cooler temperatures than many competitive products.

The label lists 55 grassy and broadleaf weeds. With a much broader spectrum of broadleaf

weeds than other products of its type, this makes it an excellent option for commercial landscape maintenance in warm-season turf. Katana is absorbed through both the leaves (50%) and roots (50%). It is effective at very low rates.

Katana Turf Herbicide, is the newest addition to Gordon's® ProForm® product line of fast-acting herbicides. Like other products in this line, Katana continues to work in cooler weather by root uptake and is not as temperature dependent as other competitive products.

TRANSITION - AID

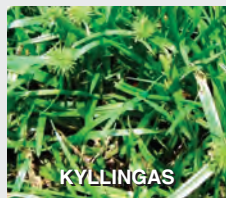

CLUMPY RYEGRASS

POA ANNUA

TALL FESCUE

KYLLINGAS

SEDGES - ANNUAL

BROADLEAF WEEDS

**FAST!**

- *Ryegrass transition - aid - FAST!*
- *More active in cooler temperatures than many competitive products*
- *Excellent grassy weed control - clumpy ryegrass, fescue, Poa annua and Poa trivialis*
- *Outstanding control on kyllingas and annual sedges*
- *Controls wide range of broadleaf weeds*
- *Extensively tested at major universities*
- *Good tank-mix partner for other herbicides*
- *Both root and foliar uptake*
- *Cool-weather performance*
- *Not labeled for use on residential turf*

### RECOMMENDATIONS

For the removal of cool-season grasses and weeds from tolerant grass species on golf courses (fairways, roughs and tees) and other non-residential turf areas such as industrial parks, sod farms, seed farms, cemeteries, professionally managed college sports fields, commercial lawns and professional sports fields.

ACTIVE INGREDIENTS:	By Wt.
Flazasulfuron*	25.0%
Other Ingredients	75.0%

\*N-[[[4,6-dimethoxy-2-pyrimidinyl)amino]carbonyl]-3-(trifluoromethyl)-2-pyridinesulfonamide.

EPA Reg. No. 71512-12-2217

### PACKAGING:

Plastic U.S. ounces: 4 X 3 per case:  
shipping weight . . . . . 2 lbs.

### READ LABEL BEFORE USE
