GORDON'S® LIQUID EDGER is recommended for the control of a wide variety of unwanted vegetation around buildings, along sidewalks and driveways, and under trees and ornamentals. This product may also be used for complete lawn renovation. It is deactivated on contact with the soil.

**INSTRUCTIONS:** This product is ready-to-use. One gallon will cover up to 250 square feet or 1,200 linear feet (with a band 2.5 inches wide). Apply the spray solution with a pressure sprayer using a nozzle or nozzle setting that gives a fine spray.

GORDON'S® LIQUID EDGER may be applied directly from the container. First, remove cap that covers applicator head. Be sure that applicator head is firmly fastened in place. Create spray pattern by turning container over. Thoroughly cover unwanted vegetation with product.

For spot treatment, hold container just a few inches above undesired vegetation.

**GENERAL WEED CONTROL:** Spray unwanted vegetation thoroughly to the point of runoff. Wilting will appear in 1 to 3 days and thorough browning in about 5 to 7 days. Repeat applications may be necessary, particularly for hard-to-kill perennials. The best kill is obtained on young plants and during hot, sunny weather.

Apply product to thoroughly wet unwanted vegetation to point of runoff.

**LAWN RENOVATION:** The area to be treated should be mowed before treatment. Bermudagrass and other deep-rooted perennials or uncovered foliage may require a second treatment. Reapply 5 days later if green areas remain. When foliage is all brown, matted areas should be raked and bare spots scarified. About 5 days after last treatment, water thoroughly and then seed at rate recommended for new lawns. Seed must be raked into soil. Keep seeded areas well watered.

Do not apply directly or allow spray to come into contact with foliage, green bark, grafted unions, or scuffed, damaged or broken bark when spraying around trees and ornamentals.
